

# What's the News?

© 2013 by R. Bowdon

key of C, Jim: Electric

*Intro like first half of a verse, starting with walk up from G*

So you never know just who you'll meet / going out in public now  
Today I may have caught a glimpse of her / Doesn't matter anyhow  
She was wearing that old leather coat / That I gave her on the day  
We went sailing on that rented boat / We sailed it all around the bay

## B Part

I get the traffic in Toronto / and the price of avocados  
Is there any news / about her love for me  
Well my Twitter feed is hummin' / about the big storm that is comin'  
And the riots in / that country overseas  
What's the news? / what's the news?

I'm glad I have a lot of friends / Because they help me when I'm down  
I get to read about the trips they take / without ever leaving town  
I don't know how many friends I have / Well I guess that's not quite true  
Last time I checked on Saturday / Six hundred and fifty two  
What's the news? / what's the news?

break: A part, just like verse above

I am mobile online all the time / it's a habit you might say  
all my friends they know just where I am / they can reach me night or day  
so I always know what's going on / what's the trend and where's the spot  
where to find the people in the know / who's in love and who is not

## B Part

Map a route to Carolina / Chart the price of rice in China  
Is there any news / about her love for me  
Now Politico is buzzing / about elections that are comin'  
And what the President / said last night on TV  
What's the news? / what's the news?

outro = repeat last line, hold the first "news" for four measures then quick out
